PROFILE

Computer Science student at Dedan Kimathi University of Technology with a solid grounding in programming, data structures and databases, and a growing interest in artificial intelligence. Seeking an internship or attachment opportunity to learn, contribute, and apply skills in software development, web technologies, AI, and problem solving.

EDUCATION

BSc Computer Science | Dedan Kimathi University of Technology, Nyeri, Kenya
Currently studying

- Relevant coursework: Data Structures and Algorithms, Databases, Object-Oriented Programming, Operating Systems, Introduction to Artificial Intelligence

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL

AI & Data: Pandas, NumPy, scikit-learn, basic machine learning and neural networks

AI Tools: Prompt engineering, working with LLM APIs

Web Development: HTML, CSS, JavaScript

Tools & Platforms: Git, GitHub, Linux, VS Code

PROJECTS

Whats AI — AI-Powered WhatsApp Business Assistant

- Developing an AI-powered WhatsApp assistant designed to help businesses communicate with customers, manage product enquiries and orders, support payments, and provide faster customer service.
- Technologies: Next.js, TypeScript, AI, WhatsApp, M-Pesa.
- Live project: https://whats-ai-app.vercel.app/
- Portfolio/GitHub: github.com/jerrywendo034-cell/jerry-portfolio

Machine Learning Classification Project

- Trained a simple classification model on a public dataset and evaluated its accuracy using Python and scikit-learn.

Database Web Application

- Built a small web application with a database and user login.

INTERESTS

Artificial intelligence, software development, automation, web development, and problem solving.

LANGUAGES

English, Kiswahili, French
